

BEFORE THE DAY

1

Register your #CyberCleanup on cyberworldcleanupday.fr

2

Define the perimeter to be cleaned

| Servers, computers, clouds
| Email | Téléphones and tablets | Social networks

3

Explore additional resources

4

Prepare the logistical organisation

| Refer to the "practical sheets"
available in the "Tools" section of the website

THE DAY

1 BRIEFING

4 IMPACT MEASURES

After the cleaning, we measure the cleaned data and we realise the positive impact of our action during this operation on our carbon footprint

 1 Mo = 19 g CO2eq

2 PREPARATION

Depending on the chosen cleaning scope, the measurement of the data is prepared

3 ACTION

- | We all clean up together, using the "I clean up..." guides for the area chosen for the operation
- | We become aware of the type of data deleted
- | We help each other and share our tips

AFTER THE DAY

1

Compile the volumes of data deleted by all participants in the summary document

2

Send back the completed form to the national project team
